Accident statistics show us that falls from height are THE biggest cause of workplace deaths and one of the biggest causes of major injuries every year.

Working at height is a high risk activity and it is important that all employers and employees make sure safety is a top priority. Fatalities and accidents occur because working at height is not being properly controlled.

This 35 minute title covers:

- The need to follow safe systems at work
- The need to comply with your training
- How accidents can happen
- How to stay safe whilst working at height

With 21 different subtitled languages to choose from, including English, this DVD is ideal for any company that may have workers who do not have English as their first language. This DVD will train them in their own language.

"Another excellent product from Safety Media it covered all the points needed including a small section on Ladder Safety which is the main area I needed to cover. I have no problem in recommending this title to anyone who needs a training/information media package for employees who need Working at Heights training"

G Partridge, Training Officer

RELATED PRODUCTS:

The Working at Heights Assessment Forms are an essential tool for anyone who works on scaffolding, ladders or at any kind of height. The forms enable the user to assess any hazards or risks which may be present before the task is completed. Further Assessment Forms can be bought for as little as £14.99.

The Working at Heights Booklets take a look at the importance of planning and organising a task. It also looks at the do's and don'ts when using various equipment to work at height. The booklets will provide the basic training needed for anyone who is going to undertake a working at height task. The booklets also act as a handy reminder once the training session is over. Further booklets can be bought for as little as £29.50 for a pack of 20 booklets.

Buy the DVD and when the title is updated in the future you can purchase an upgrade for only £70 (Plus P&P and VAT).

LEGISLATION

The Working at Heights Regulations came into force on the 6th April 2005. The Regulations state that all work at height is properly planned and organised and those who undertake the task are competent. The Regulations also require that all equipment for work at height is properly inspected and maintained before a task takes place.

This DVD will ensure that your employees understand the importance of following the regulations.
